SUMMARY

Full-stack web developer and fast learner who is comfortable working in team-oriented and solo environments. With an educational background in film and business, I have plenty of experience working in collaborative environments requiring small teams. My experience in the e-commerce business has taught me how to self-learn and run a successful business with little to no direction or experience.

I have always loved computers and have built over 10 personal desktops in my life. Prior to the web development bootcamp I took a course on C++ and Fortran which piqued my interest in this field. Finding new joy the field of programming, I am ready to improve my skills as best as I can.

EDUCATION

The University of Texas at Austin · 2009 - 2013
